SHUT OFF DAY – April 1st, 2026

\$30.00 Disconnect fee and \$30.00 Reconnect fee

No exceptions will be made.

Sewer Usage Calculation

The new sewer calculation based on the usage from December 01, 2025 through January 31, 2026 will reflect starting on the March bill. The sewer average is calculated by taking the usage from those months and dividing by 2. That amount is billed at \$10.80 per thousand gallons of water. The December and January usage is used to ensure no outside watering is factored into your annual sewer usage calculations.

Plumbing System

The plumbing in a home is the homeowner's responsibility. The responsibility starts at the connection to the main water line. The curbstop (shutoff valve) in the yard or driveway must be cleared out of debris and rocks along with ensuring the line is straight. If there was a water leak at a property and the shutoff valve is unable to be utilized, it could result in damage to a property from the water not being able to be shut off at the curbstop. Each home should have two shut off valves inside of the home that should be in good working order. There should be a shut off valve before and after the meter to ensure if there is water leak at the property the valves can be utilized. If there is a need to have the curbstop (shutoff valve) turned off for repair, please contact Colorado Centre Metropolitan District to have shut off. **If the curbstop is turned on or off without the water department being the ones to do it, a tampering fee of \$1000.00 will be charged.** To shut off the water it is a \$30.00 disconnect fee and to reconnect is \$30.00. If the request is made after hours including the weekend it will be a \$60.00 disconnect and \$60.00 reconnect fee.
