Sewer Calcuation Period Reminder

The sewer calculation period is from December 1st, 2026 through January 31st, 2027. The usage during these two months determines your average sewer calculation for the next 12 months of billing. Please conserve your water usage during this time to help lower your sewer average for the next year. Your water usage can be monitored @ EyeOnWater: Making Water Visible.™

Reduced bills

There will be no **Water usage fees** for the months of October 2026 through December 2026 usage which will reflect on the November 2026, December 2026, and January 2027 bills. There will also be no **Water Administrative Fees** for the months of November 2026 and December 2026 which will reflect on the December 2026 and January 2027 bills.

There will be no **Sewer Administrative Fees** for the months of October 2026 through December 2026 which will reflect on the November 2026, December 2026, and January 2027 bills.

FOG

Fats, Oils, Grease

Friendly reminder: do not pour fats, oils, and grease down the drain. When these substances are poured down the drain, they can build up on the inside of sewer pipes, eventually causing a blockage that requires calling a plumber for services like drain cleaning, hydro jetting, sewer pipe descaling or worst-case scenario, a broken pipe repair. As more wastewater is sent down the line, it puts pressure on the blockage, leading to a backup. In some cases, the blockage can be severe enough to cause an overflow, spilling sewage onto the ground or into homes and businesses. Some common subtances that contain fats, oils, or grease:

Cooking oil, Butter, Lard, Bacon Grease, Food scraps, Gravy, Sauces
